

SCHAUMANN Energy

Protected fat for higher milk yields

Product effects:

- Rumen stable fat to increase energy density of the ration
- No negative influence on ruminal bacteria
- High digestibility of the fatty acids

For more energy:

- Ca-saponified, only fat components of plants
- Energetic upgrading of the ration especially for high yielding dairy cows
- Positive influences on fertility and animal health
- Higher melting point prevents clump formation and, hence, a decreased digestibility

Dosage:

Depends on the complete fat content of the ration
Varies between 200 - 800g per cow and day

SCHAUMANN Energy
More energy for phenomenal milk yields
