

KALBI VITAL PRO

The palatable calf paste to enhance vitality in the first weeks of life

The combination of immunoglobulins (specific protection against common germs causing diarrhoea such as E. coli, rota/corona virus, cryptosporidium) and PROVITA LE supports the effect of the colostrum in newborn calves and stabilises the gut flora in stressful situations, e.g. relocation. The vitamins A, D, E and C strengthen the resistibility and enhance vitality.

Application:

Administer 10 ml KALBI VITAL PRO straight after birth and on the 2nd day of life another doses of 5 ml. Due to its packaging KALBI VITAL PRO is easy to use and can be applied exactly.

If gut disturbances occur 10 ml KALBI VITAL PRO should be administered on two following days.

Effects:

- Reduced malfunctions of digestion
- Enhancement of vitality
- Increase of daily gains

Selling unit:

4 cartridges á 30 ml
