

## **MILLAPHOS-Programme**

### **For successful sheep and goat feeding**

Basis for an economic sheep and goat husbandry are a high fertility with good birth and rearing results, as well as an ideal fattening performance. To fulfil these different performance levels a high quality feeding is necessary.

The MILLAPHOS-programme fulfils the requirements for mineral and active substance supply in sheep and goat feeding with premium products.

#### **Characteristics:**

- Mineral nutrients (calcium, phosphor, sodium, magnesium)
- Trace elements (zinc, manganese, iodine, cobalt)
- vitamins

#### **Effects:**

- high fertility and secure milk yield
- enhanced forage intake
- stabilisation of digestion
- secure fattening and slaughter performance
- heat stimulation and preparation

#### **MILLAPHOS Z:**

For sheep and goats for breeding. Ideal mineral and active substance supply for a good fertility and a secure milk yield. Can be used in organic farming.

15-30 g per animal and day

#### **MILLAPHOS L:**

For lambs. Mineral and active substance combination with a high level on vitamins for an ideal rearing and secure fattening period.

15-30 g per animal and day
