

Pig fattening with SCHAUMALAC M40M & M55M

The new way forward in pig fattening!

SCHAUMANN's new SCHAUMALAC M product line is based on powerful mineral feeds adjusted to all phases of pig fattening which are mixed into the ration with a 3 % concentration. Due to the use of the probiotic BONVITAL performance in pig fattening furthermore is enhanced in a natural way. The ingredients of the SCHAUMALAC M products for rations containing high portions of maize are especially well adapted in the area of amino acids. The SCHAUMALAC M products for pig fattening contain all essential trace elements and vitamins adjusted to the requirements of high fattening performances.

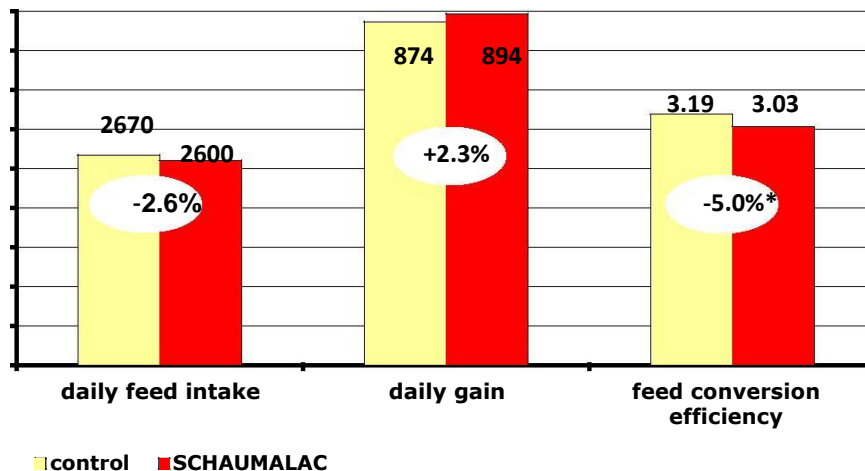

SCHAUMALAC M in pig fattening means:

- Shorter fattening periods
- Lower feed input
- Ideal carcass quality with
- Lower losses.

SCHAUMALAC M40M / M55M

Mineral feed for hybrid-pigs
