

SCHAUMALAC FERKELSTART 30 PROTECT

For a successful and secure weaning

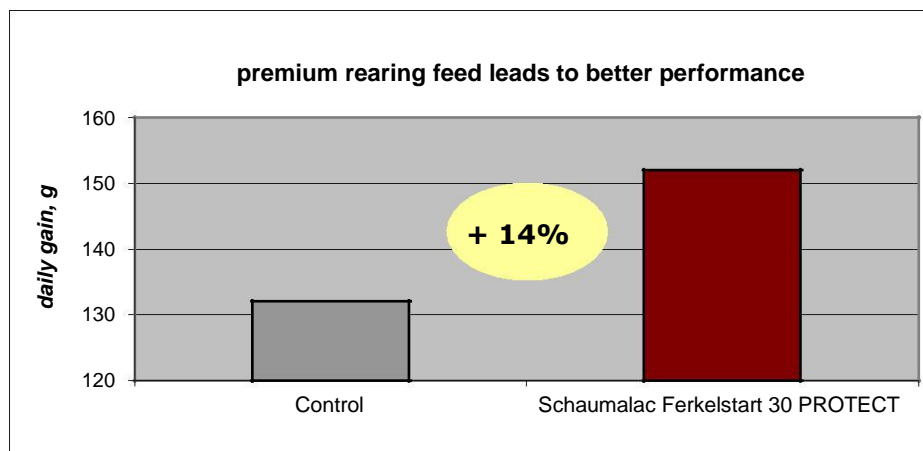

SCHAUMALAC FERKELSTART 30 PROTECT is the supplement for premium prestarters and performance strong weaning rations. The components assuring security are BONVITAL, CERAVITAL and phytase which support the piglet in its development in an optimal way and supplement prestarter and weaning rations in an ideal form. An additional use of soy is not necessary.

SCHAUMALAC FERKELSTART 30 PROTECT – mixtures lead to a high amount of security and performance ability in homemade prestarter and weaning rations:

- Through the combination of the probiotic BONVITAL with Phytase, CERAVITAL and aroma substances feed intake is increased and nutrient utilization of the feed is improved. The digestion gets stabilised and growth performance increased.
- The equipment with the four amino acids lysine, methionine, threonine and tryptophan with 100 % digestibility as well as the supplementation of highly digestible protein sources secures a high protein quality and provides for an optimal protein digestion. The protein load removal prevents digestion problems. A further use of soybean meal can be managed variably and a total abdication of soybean meal is possible.
- Premium milk components and easily digestible protein sources supply the necessary enrichment of rearing rations for the piglets.

Praxis Trial: Deubner, Jedenspeigen

Control: 4% rearing mineral, 10% supplemental feed, 16% soybean meal
trial: Schaumalac Ferkelstart Start 30 PROTECT
