

## **SCHAUMA WEAN**

### **The unparalleled prestarter**

At the time of weaning the piglets are very sensitive against every kind of stress and have high requirements on their feed. Only premium and easily digestible components are suited for them.

SCHAUMA WEAN is made up of thoroughly chosen, highly digestible and palatable components. Through the use of especially combined dietetic substances a high salubrity is guaranteed.

SCHAUMA WEAN supplements the nutrition of suckling piglets through valuable nutrients and vital substances and, hence, prepares them for the exclusive supply with non-milk feed after weaning.
