

RINDAMIN GM

Universal mineral and active substance mixture

Product target and product effect

At any time cows need a balanced supply of mineral and active substances in order to be able to reach their maximum performance. RINDAMIN GM is the specific active substance mixture for rations with a balanced Ca:P-ratio.

RINDAMIN GM complements the ration with mineral elements, trace elements and vitamins to promote health and fertility.

- Mineral and active substance mixture especially for lactation cows.
- Thoroughly chosen raw materials to provide a high palatability.
- Especially for the most common forages adjusted Ca-P-relation.
- Provides best preconditions for animal health through the use of special raw materials.
- Adjusted vitamin E and selenium content.
- Widespread equipment with all necessary mineral nutrients, trace elements and vitamins.

Dosage:

150 - 250 g/ cow and day during the entire lactation depending on milk yield.
